WASHINGTON-LEE HIGH SCHOOL

An IB World School Since 1996

Challenging . Rigorous . Demanding . Rewarding

INTERNATIONAL BACCALAUREATE DIPLOMA PROGRAMME

Washington-Lee was established in 1924. It educates one of the nations' most diverse and sophisticated

student populations – students come from 71 countries and speak 45 different languages. The school mission is to challenge all students to strive for the best, to become life-long learners, and to become successful, active members of the global community.

The High School Diploma

Students who gain at least 26 credits during Grades 9-12 will earn an Advanced Studies Diploma from the Commonwealth of Virginia. These credits are distributed as follows: English (4), World Language (3), History & Social Science (4), Laboratory Science (4), Mathematics (4), Health & Physical Education (2), Fine Arts (1), Economics and Personal Finance (1), and Electives (3). To prepare for the rigor of the full IB Diploma Programme, students are encouraged to take intensified and/or AP courses in Grades 9 and 10. In grades 11 and 12, students either take the International Baccalaureate Diploma Programme or a challenging mixture of IB and non-IB courses. A suggested general course sequence for students who seek to earn an International Baccalaureate Diploma can be found in the APS Program of Studies.

The International Baccalaureate Diploma

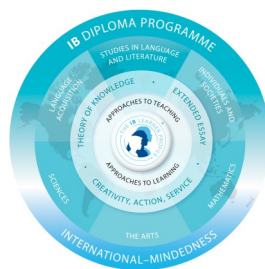

Washington-Lee High School was first authorized to teach the International Baccalaureate (IB) Diploma Programme in 1996-1997. Since becoming an authorized IB World School, Washington-Lee has consistently ranked in the *top 766 of America's Best High Schools* according to Newsweek and the Washington Post.

The IB Diploma Programme provides a rigorous education for highly motivated and academically proficient Washington-Lee students in Grades 11 and 12. The IB Diploma Programme is unique in that it provides a cohesive interdisciplinary education leading to a diploma that is recognized at universities throughout the world. It places emphasis on the ideal of promoting international awareness and understanding and aims to produce students who are passionate and critical thinkers, life-long learners, and active participants in the local and global community.

What is the IB curriculum?

The diploma curriculum contains six subject groups together with a core made up of three parts. This is illustrated to the right.

Full IB Diploma students must study six subjects selected from the approved subject groups. Three subjects are studied at higher level (HL courses representing 240 teaching hours), and the remaining three subjects are studied at standard level (SL courses representing 150 teaching hours).

Core Requirements

In addition to completing the six required subjects, all full Diploma students must complete the following core requirements: a 4,000 word Extended Essay, Theory of Knowledge (an interdisciplinary course linking all IB subjects) and Creativity, Action, Service (CAS—approximately 150 hours of extracurricular activities and service learning projects). These three elements are compulsory and are central to the philosophy of the Diploma Programme. Students who take individual IB courses are exempt from the core requirements.
